

Jacuzzi® Hot Tubs Technical Bulletin

Change to J-400™ Diverter Nut

To increase reliability in the field, Jacuzzi® Hot Tubs is making a **change to the diverter nut on all J-400™ Collection Models**. This part (6540-455) will be changing from clear Lexan material to grey glass-filled ABS material.

When ordering this part for service on spas made before September 2023, please note that the replacement parts will be a different color (grey) than the original part (clear). This does NOT indicate that you have received the wrong part. The grey part is interchangeable with the clear version. The clear version of this part will no longer be available.

Please distribute this important information to your entire staff.
